

# GIGANTIC BLUEJAY STEALING

The following instructions are helpful in putting this children's book together properly. The solid lines are meant to be cut and the dotted lines are meant to be folded. You will need to complete these instructions for both sheets of paper. Before you start, you will need to cut the white borders around both sheets of paper. You are now ready to create the book. I hope you enjoy it.

- Using the sheet with pages 1-7, fold along the long middle line, then unfold the paper.

- Fold along the small middle dotted line so that the images are facing out. Using a scissors, cut along the solid line, then unfold the paper.

- Fold the outside dotted lines inward, repeat on the other side, then unfold the paper.

- Fold the paper along the long middle line so that the images are facing out.

- Hold each end of the paper and push the ends inward to create an X-shape.

- Fold together so that the glue page is on the outside. Then repeat steps 1-7 for the sheet of paper with pages 8-14.

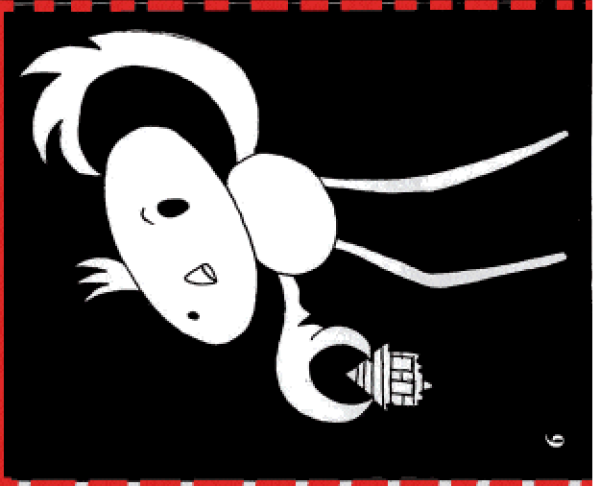

- Apply glue to the two blank glue pages and paste the booklets together.
